Page Navigation Using Buttons in FlutterFlow

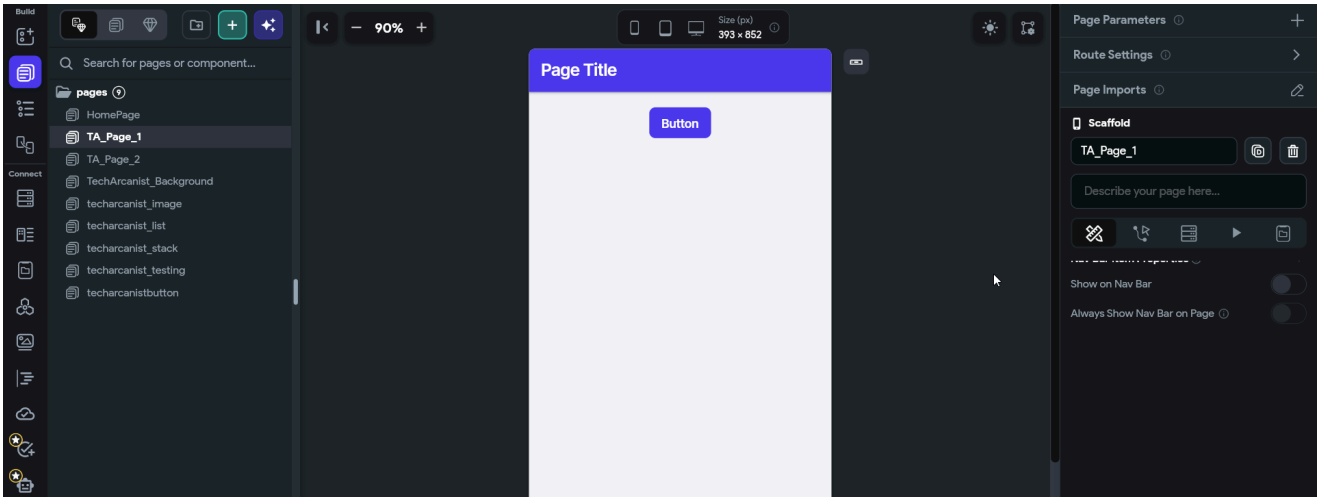

Now we will learn how to **navigate between two pages** using buttons in FlutterFlow.

Step 1: Create Two Pages

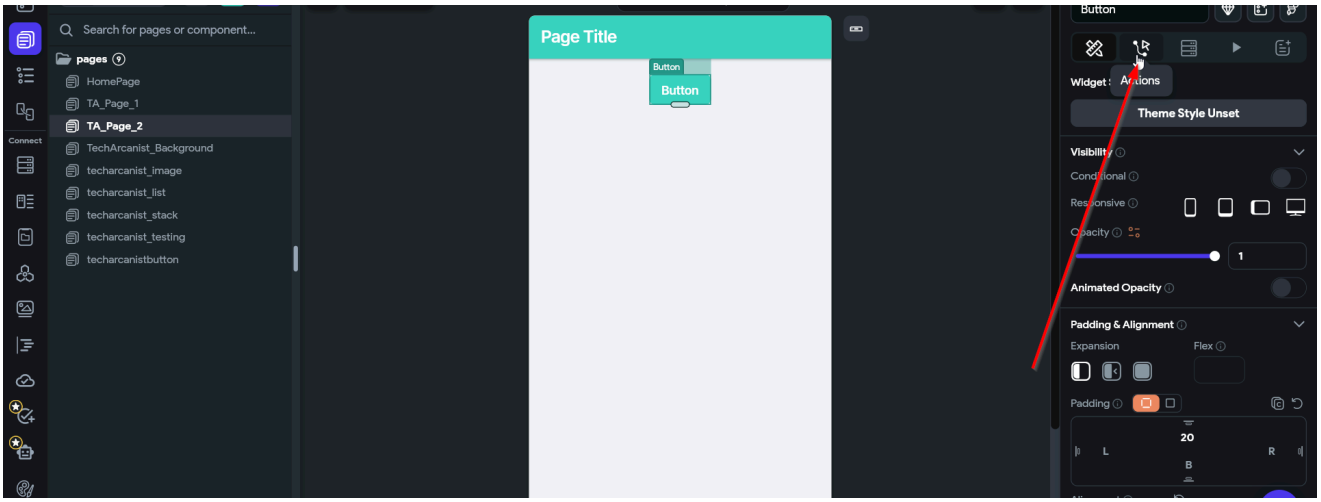

First, create **two separate pages** in your FlutterFlow project.

Step 2: Add Buttons on Both Pages

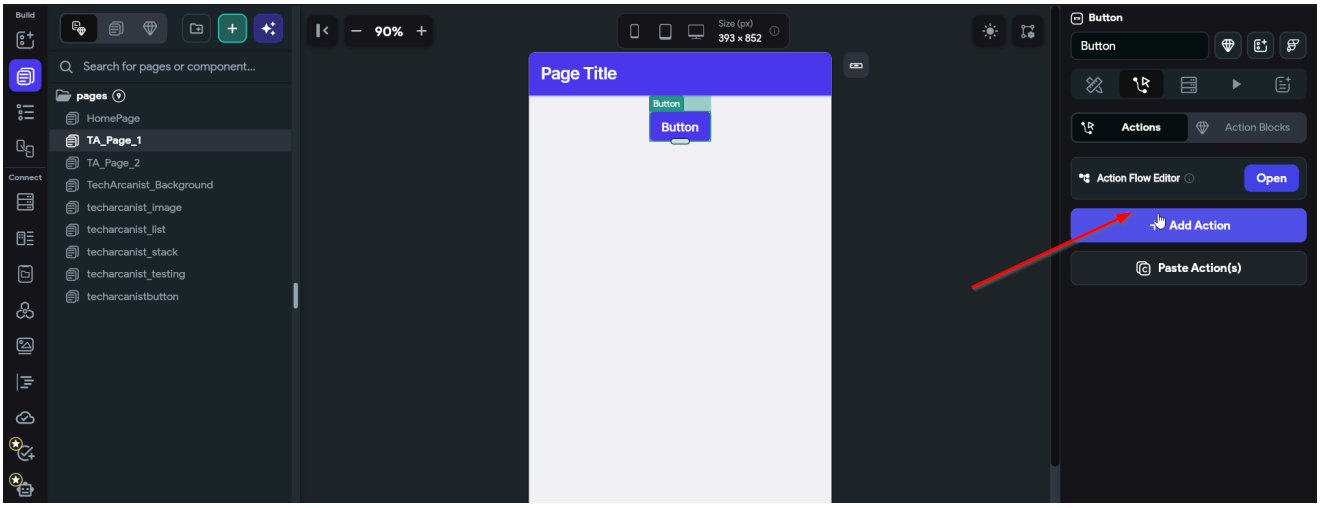

Add **one button on each page**.

Step 3: Open Button Actions

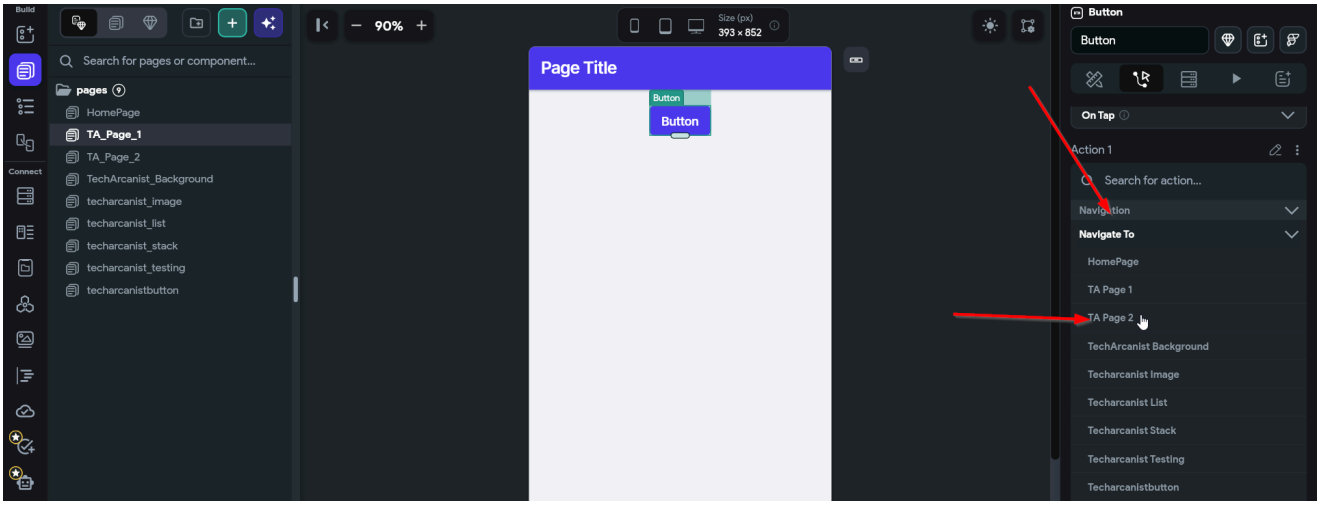

Click on the **Button**, then go to the **Actions** section.

Step 4: Add an Action

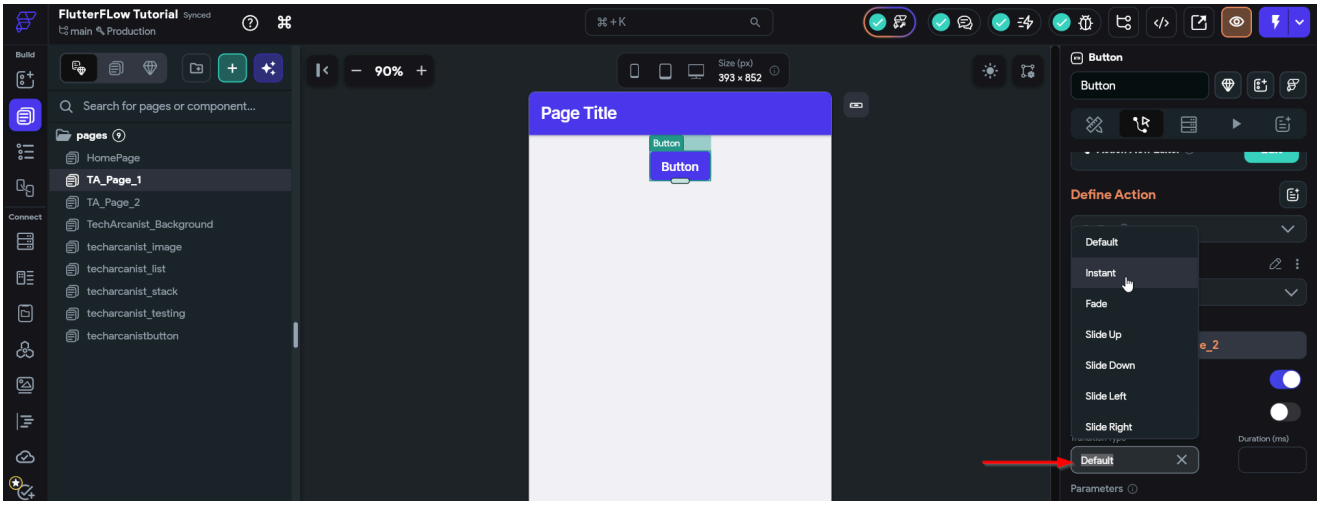

Click on **Add Action**.

Step 5: Choose Navigation Action

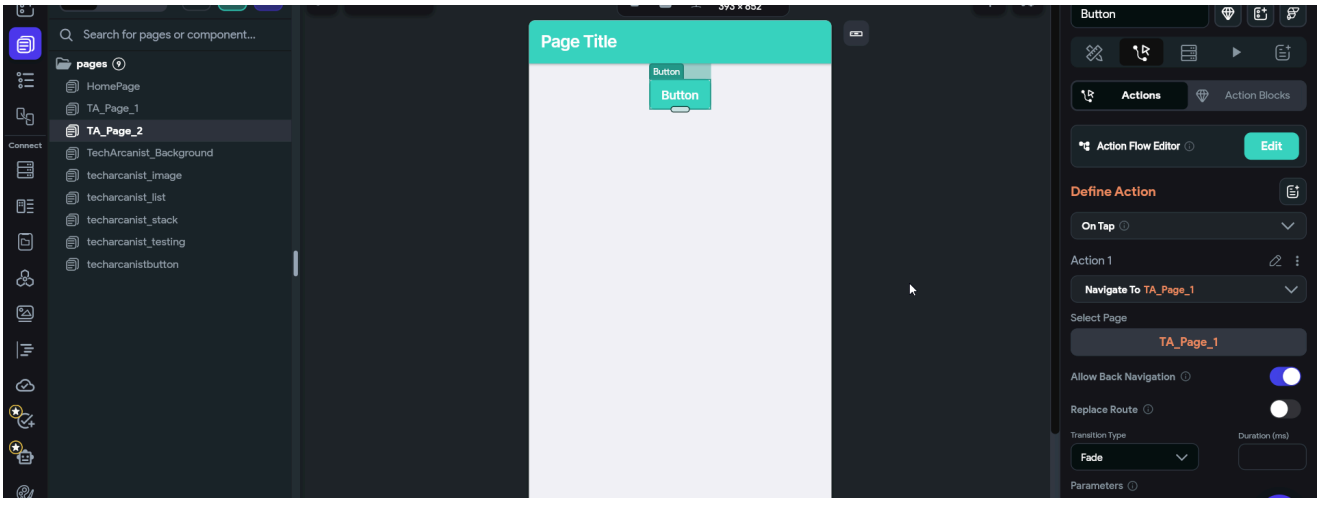

1. Select **Navigation**
2. Choose **Navigate To**
3. Select **Page 2** (or the page you want to navigate to)

Step 6: Select Transition Type

Choose the **transition animation** for how the page should open (e.g., slide, fade, scale, etc.).

Step 7: Repeat for the Other Button

Repeat the same steps for the button on the second page (to navigate back or to another page).
